

Future funding opportunities under LIFE for addressing Particulate Matter in Central Europe

Written by Daniel Lešínský - Last Updated Wednesday, 05 March 2014 14:04

On 18th February 2014 in Bratislava organized EC in cooperation with CEPTA and with Slovak ENVIRO ministry the seminar "Future funding opportunities under LIFE for addressing Particulate Matter in Central Europe".

Presentation and discussion of future funding opportunities under the new LIFE Programme with the regions most affected by PM problems in the Czech Republic, Slovakia and Poland to reduce PM in Central Europe, by building capacity, exchanging experiences and facilitating the best use of local, regional, national and EU Structural Funds.

At the seminar was presented and discussed best practice LIFE+ projects related to air-quality improvement from different EU countries as well possibility of integrated project focused on PM reduction under LIFE program in coming period.
