

On Sunday 21st September 2014, civic association CEPTA organized an information stand on SNP square (“Námestie SNP”) in Zvolen. Its aim was to promote cycling, public transport, ecodriving, in short sustainable mobility that does not pollute the air and is climate-friendly. The event, supported by the project Clean Air, Cyklo Zvolen 2014 and Soot-free for the Climate campaign, was held within the European mobility week, which annually starts on 16th September and ends by Car-Free Day on 22nd September. The information stand was also a part of the whole world action “The Global People's Climate March”, which aimed to address people concerned with climate changes and air quality. More about The Global People's Climate March initiative you can find at:

Miss Slovakia 2014 Laura Longauerová participated actively in this event, as well as ...

... SAD Zvolen a. s., which provided an ecological bus for public transport fuelled by CNG.

# Climatic and Cyclig Initiative and Car Free Day in Zvolen (21st - 29th September 2014)
